DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-12, 14-24, 26-37 and 39-49, drawn to an isolated polynucleotide, classified in class 536, subclass 23.1. If this Group is elected, then the below summarized sequence election is required.
- II. Claims 13, 25, 38, and 50, drawn to a method for identifying and tracking an outbreak of an infection cause by an organism, classified in classes 435 and 702, subclasses 6 and 20, respectively. If this Group is elected, then the below summarized sequence election is required. If this Group is elected, then the below summarized specie election is also required.

Sequence Election Requirement Applicable to All Groups:

- 2. In addition, each Group detailed above reads on patentably distinct sequences. Each sequence is patentably distinct because they are unrelated sequences, and a further restriction is applied to each Group. For an elected Group draw to amino acid/polypeptide sequence, the Applicants must further elect a single amino acid/polypeptide sequence. For an elected Group drawn to nucleotide sequences, the Applicants must elect a single nucleic sequence (See MPEP § 803.04). It is noted that the multiple of sequence submissions for examination has resulted in an undue search burden if more than one nucleic acid sequence is elected, thus making the previous waiver for up to 10 elected nucleic sequences effectively impossible to reasonably implement.
- 3. MPEP § 803.04 states:

Application/Control Number: 10/073,256 Page 3

Art Unit: 1631

Nucleotides sequences encoding different proteins are structurally distinct chemical 4.

compounds and are unrelated to one another. These sequences are thus deemed to normally

constitute independent and distinct inventions with the meaning of 35 U.S.C. 121. Absent

evidence to the contrary, each such nucleotide sequence is presumed to represent an independent

and distinct invention, subject to a restriction requirement pursuant to 35 U.S.C. 121 and 37 CFR

1.141 et seq. Examination will be restricted to only the elected sequence. It is additionally noted

that this sequence election requirement is a restriction and not a specie election requirement.

SPECIE ELECTION REQUIREMENT FOR GROUP II:

This application contains claims directed to the following patentably distinct species of 5.

the claimed invention:

Species A: Enterococcus faecalis.

Species B: Helicobacter pylori.

Speices C: Staphylococcus aureus.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for 6.

prosecution on the merits to which the claims shall be restricted if no generic claim is finally

held to be allowable. Currently, claims 1-9, 11, 12, 14-22, 24, 26-34, 36, 37, 39-46, 48, and 49

are generic. These species are distinct due to each organism being distinct and each organism is

generally separately analyzed and published, and thus document the undue search burden if

searched together.

Applicant is advised that a reply to this requirement must include an identification of the 7.

species that is elected consonant with this requirement, and a listing of all claims readable

Application/Control Number: 10/073,256 Page 4

Art Unit: 1631

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

- 8. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
- 9. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
- 10. Inventions in Groups I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the nucleic acid molecule of Group I may be utilized in the distinct usages as needed in Group II, a method for identifying and tracking an outbreak of an infection cause by an organism or alternatively, as an antisense therapy. All of these usages are distinct as requiring distinct and different functions and results thereof without overlapping search due to different subject matter. This lack of overlapping searches documents the undue search burden if they were search together.

Application/Control Number: 10/073,256 Page 5

Art Unit: 1631

11. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

- 12. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 13. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
- 14. Papers related to this application may be submitted to Technical Center 1600 by facsimile transmission. Papers should be faxed to Technical Center 1600 via the PTO Fax Center located in Crystal Mall 1. The faxing of such papers must conform with the notices published in the Official Gazette, 1096 OG 30 (November 15, 1988), 1156 OG 61 (November 16, 193), and 1157 OG 94 (December 28, 1993) (see 37 CFR § 1.6(d)). The CM1 Fax Center number is either (703) 308-4242 or (703) 305-3014.
- 15. Any inquiry concerning this communication or earlier communications from the examiner should be directed to C. Dune Ly, whose telephone number is (703) 308-3880. The examiner can normally be reached on Monday-Friday from 8 A.M. to 4 P.M.

Art Unit: 1631

- 16. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Woodward, Ph.D., can be reached on (703) 308-4028.
- 17. Any inquiry of a general nature or relating to the status of this application should be directed to Legal Instruments Examiner, Tina Plunkett, whose telephone number is (703) 305-3524 or to the Technical Center receptionist whose telephone number is (703) 308-0196.
